

Aerial Work Platforms

Aerial Work Platform - There are a lot of accessories designed for lift trucks that could be utilized in order to help expand the functionality of your forklift and allow you to carry items, handle materials with out difficulty or to accomplish clean-up tasks.

Lots of the accessories are specifically designed to fit on the forks themselves. Fork extensions for example, are utilized when you need more fork length, that increases lifting capacity. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are another variety utilized when transporting rolled material to be able to ensure it does not roll off of the typical flat blades.

Lifting attachments can be pivoting and telescoping crane attachments. They are available in various styles. These attachments are normally meant for transporting metal bars, poles, lumber or whatever kind of bulky objects. Other attachments such as different kinds of hooks and hook plates are accessible to be able to carry items utilizing a chain or sling. Magnetic lifters and slab lifters are other items which could be used with hook accessories. Slab lifters are specialized attachments which are designed for carrying various materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that connect to your forklift so as to make moving rolls of carpet easier. The attachment hooks onto the forklift's blades and has a pole that goes through the middle of the carpet roll.

There are many other types of lift truck accessories which could be intended for facility maintenance like for instance snow blades. These blades attach to front end loaders and could move materials like for example snow, dirt and soil. Other common cleanup attachments consist of magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the forklift forks hook onto for sweeping big spaces like warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris such as on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up quick and simple.

Material spreaders are other accessories utilized on lift trucks. These spreaders are helpful for various applications like for instance spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting accessory which many companies use day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location with the use of the lift truck. Larger platform units have added space for workers so as to bring tools and other essential objects meant for the job. Usually work platforms are made of steel or ploy material.
