

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Newly retired, after spending many years working with his brother to build their crane business into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road expedition.

Whilst on their journey, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered an infinite marketplace for a product that could quickly and securely lift individuals in the air to accomplish maintenance and other construction services.

After returning from their trip, John set up a partnership with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into quite a few global markets and continues to cultivate new equipment to guarantee that consumers are able to become safer and more efficient within their workplace.
